BA Sociology Honours | Semester V | Calicut University

Classical Sociological Theory

Course Code: SOC5CJ301 • Module 3

Module 3: Karl Marx: Foundations of Revolutionary Materialism

Course: SOC5CJ301 – Classical Sociological Theory • **University of Calicut (CUFYUGP 2024)**

1. Curricular Orientation & Advanced Theoretical Foundations

Module 3 ("Karl Marx: Foundations of Revolutionary Materialism") within *Classical Sociological Theory* provides advanced fifth-semester undergraduate scholars with comprehensive theoretical literacy, analytical rigor, and specialized empirical insight. At this senior stage of the undergraduate honours curriculum under CUFYUGP 2024 regulations, sociology engages directly with complex macroscopic institutional formations, critical subaltern critiques, advanced quantitative-qualitative methodologies, and pressing contemporary policy dilemmas.

Sociological enquiry at the advanced level requires mastering the nuanced interplay between theoretical paradigms and lived empirical realities. By critically examining karl marx: foundations of revolutionary materialism, students develop the capacity to dissect structural power relations, evaluate state policies, interrogate ideological representations, and appreciate the unique historical dynamics governing social change in India and Keralam.

> **Core Epistemological Focus of Module 3**
>
> **Advanced Analytical Questions:** What are the structural and institutional mechanisms through which karl marx: foundations of revolutionary materialism operates in modern societies? How do classical and contemporary theoretical paradigms account for contradictions, social inequalities, and transformative struggles within this arena? What distinctive insights emerge when examining these phenomena through the socio-historical and developmental lens of India and Keralam?

2. Comprehensive Analysis of Dialectical and Historical Materialism: Productive Forces, Relations of Production, and Economic Base vs. Superstructure

The scholarly investigation of **Dialectical and Historical Materialism: Productive Forces, Relations of Production, and Economic Base vs. Superstructure** represents a core analytical domain within this course. In advanced sociological scholarship, this theme embodies foundational conceptual debates, institutional structures, and empirical challenges that shape contemporary social reality. Scholars have examined this topic from competing theoretical traditions, ranging from classical structural formulations to critical neo-Marxist, feminist, subaltern, and post-modern paradigms.

Analyzing dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure requires unbundling its complex internal components and historical trajectories. Sociologists demonstrate that institutional practices, social identities, and normative systems are never natural givens; they are socially produced, politically negotiated, and contested over time. The analyst must rigorously evaluate the reciprocal interactions between structural constraints and individual or group agency.

2.1. Theoretical Traditions and Scholarly Frameworks

The intellectual literature concerning dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure features diverse theoretical arguments. Positivist and functionalist approaches analyze how social patterns contribute to systemic equilibrium, institutional

continuity, and normative integration. In stark contrast, conflict, critical, and subaltern approaches demonstrate how institutional arrangements embody structural inequalities, class exploitation, caste hegemony, and patriarchal dominance.

Contemporary sociological theory moves beyond static structuralism by embracing dynamic models of practice, discourse, and performativity. Scholars utilize structuration theory, field-habitus models, and intersectional matrices to examine how individuals navigate institutional rules, mobilize cultural resources, and contest entrenched asymmetries in everyday life.

Theoretical Paradigm	Primary Analytical Focus	Epistemological Assumptions	Application to Dialectical and Historic
Structural Functionalism	Systemic equilibrium, institutional roles, social integration	Institutions exist to fulfill vital functional needs of the social organism	Examines the functional contributions of dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure to social order.
Conflict & Critical Perspective	Power monopolies, class hegemony, resource exploitation	Social patterns reflect material interests and dominance of ruling groups	Unmasks how dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure reproduces structural oppression and privilege.
Interpretative & Post-Modern	Discursive formations, symbolic meaning, performativity	Reality is socially constructed through language, symbols, and gaze	Analyzes how actors construct, negotiate, and perform dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure.
Subaltern & Post-Colonial	Subaltern standpoints, anti-caste critique, decolonization	Eurocentric models obscure subaltern lived realities and colonial violence	Reinterprets dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure from the perspectives of Dalits, Adivasis, and women.

2.2. Institutional Operations and Empirical Manifestations

In lived empirical reality, dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure functions across diverse institutional spheres—including family arrangements, state bureaucracies, corporate markets, community associations, and digital communication networks. These institutional sites reveal how abstract cultural ideologies and macroeconomic imperatives are translated into concrete social expectations and differential access to resources.

Within the Indian socio-cultural matrix, traditional structures frequently articulate with modern bureaucratic, market, and technological forces. Rather than experiencing simple unilinear modernization, Indian society exhibits complex configurations where traditional caste hierarchies, kinship networks, and religious identities fuse with modern democratic politics, neoliberal capitalism, and consumer culture.

Sociological Insight: Empirical Dimensions in India & Keralam

Within the empirical setting of Keralam and greater India, **Dialectical and Historical Materialism: Productive Forces, Relations of Production, and Economic Base vs. Superstructure** manifests unique dynamics. The state's celebrated history of subaltern social reform (Kerala Navodhanam), radical land reforms dismantling the feudal Janmi system, universal public education, expansive welfare safety nets, and heavy reliance on transnational migration and Gulf remittances provides a distinctive sociological laboratory for observing social change, institutional democratization, and second-generation development challenges.

2.3. Critical Methodological and Epistemological Issues

Investigating dialectical and historical materialism: productive forces, relations of production, and economic base vs. superstructure requires methodological reflexivity. Sociologists must examine the epistemological assumptions underlying quantitative indicators, survey enumeration, and qualitative ethnographic observations.

Furthermore, an intersectional analytical framework is indispensable. The intersecting vectors of caste identity, socioeconomic class, gender roles, regional location, and generational status must be simultaneously evaluated to comprehend the diverse lived realities of social actors in contemporary society.

3. Comprehensive Analysis of Theory of Historical Epochs: Primitive Communism, Ancient Slave Mode, Feudalism, Capitalism, and Socialism

The scholarly investigation of **Theory of Historical Epochs: Primitive Communism, Ancient Slave Mode, Feudalism, Capitalism, and Socialism** represents a core analytical domain within this course. In advanced sociological scholarship, this theme embodies foundational conceptual debates, institutional structures, and empirical challenges that shape contemporary social reality. Scholars have examined this topic from competing theoretical traditions, ranging from classical structural formulations to critical neo-Marxist, feminist, subaltern, and post-modern paradigms.

Analyzing theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism requires unbundling its complex internal components and historical trajectories. Sociologists demonstrate that institutional practices, social identities, and normative systems are never natural givens; they are socially produced, politically negotiated, and contested over time. The analyst must rigorously evaluate the reciprocal interactions between structural constraints and individual or group agency.

3.1. Theoretical Traditions and Scholarly Frameworks

The intellectual literature concerning theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism features diverse theoretical arguments. Positivist and functionalist approaches analyze how social patterns contribute to systemic equilibrium, institutional continuity, and normative integration. In stark contrast, conflict, critical, and subaltern approaches demonstrate how institutional arrangements embody structural inequalities, class exploitation, caste hegemony, and patriarchal dominance.

Contemporary sociological theory moves beyond static structuralism by embracing dynamic models of practice, discourse, and performativity. Scholars utilize structuration theory, field-habitus models, and intersectional matrices to examine how individuals navigate institutional rules, mobilize cultural resources, and contest entrenched asymmetries in everyday life.

Theoretical Paradigm	Primary Analytical Focus	Epistemological Assumptions	Application to Theory of Historical Epo
Structural Functionalism	Systemic equilibrium, institutional roles, social integration	Institutions exist to fulfill vital functional needs of the social organism	Examines the functional contributions of theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism to social order.
Conflict & Critical Perspective	Power monopolies, class hegemony, resource exploitation	Social patterns reflect material interests and dominance of ruling groups	Unmasks how theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism reproduces structural oppression and privilege.
Interpretative & Post-Modern	Discursive formations, symbolic meaning, performativity	Reality is socially constructed through language, symbols, and gaze	Analyzes how actors construct, negotiate, and perform theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism.
Subaltern & Post-Colonial	Subaltern standpoints, anti-caste critique, decolonization	Eurocentric models obscure subaltern lived realities and colonial violence	Reinterprets theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism from the perspectives of Dalits, Adivasis, and women.

3.2. Institutional Operations and Empirical Manifestations

In lived empirical reality, theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism functions across diverse institutional spheres—including family arrangements, state bureaucracies, corporate markets, community associations, and digital communication networks. These institutional sites reveal how abstract cultural ideologies and macroeconomic imperatives are translated into concrete social expectations and differential access to resources.

Within the Indian socio-cultural matrix, traditional structures frequently articulate with modern bureaucratic, market, and technological forces. Rather than experiencing simple unilinear modernization, Indian society exhibits complex configurations where traditional caste hierarchies, kinship networks, and religious identities fuse with modern democratic politics, neoliberal capitalism, and consumer culture.

> **Sociological Insight: Empirical Dimensions in India & Keralam**
>
> Within the empirical setting of Keralam and greater India, **Theory of Historical Epochs: Primitive Communism, Ancient Slave Mode, Feudalism, Capitalism, and Socialism** manifests unique dynamics. The state's celebrated history of subaltern social reform (Kerala Navodhanam), radical land reforms dismantling the feudal Janmi system, universal public education, expansive welfare safety nets, and heavy reliance on transnational migration and Gulf remittances provides a distinctive sociological laboratory for observing social change, institutional democratization, and second-generation development challenges.

3.3. Critical Methodological and Epistemological Issues

Investigating theory of historical epochs: primitive communism, ancient slave mode, feudalism, capitalism, and socialism requires methodological reflexivity. Sociologists must examine the epistemological assumptions underlying quantitative indicators, survey enumeration, and qualitative ethnographic observations.

Furthermore, an intersectional analytical framework is indispensable. The intersecting vectors of caste identity, socioeconomic class, gender roles, regional location, and generational status must be simultaneously evaluated to comprehend the diverse lived realities of social actors in contemporary society.

4. Comprehensive Analysis of Analysis of Capitalism: Commodification, Labor Theory of Value, and Surplus Value Extraction

The scholarly investigation of **Analysis of Capitalism: Commodification, Labor Theory of Value, and Surplus Value Extraction** represents a core analytical domain within this course. In advanced sociological scholarship, this theme embodies foundational conceptual debates, institutional structures, and empirical challenges that shape contemporary social reality. Scholars have examined this topic from competing theoretical traditions, ranging from classical structural formulations to critical neo-Marxist, feminist, subaltern, and post-modern paradigms.

Analyzing analysis of capitalism: commodification, labor theory of value, and surplus value extraction requires unbundling its complex internal components and historical trajectories. Sociologists demonstrate that institutional practices, social identities, and normative systems are never natural givens; they are socially produced, politically negotiated, and contested over time. The analyst must rigorously evaluate the reciprocal interactions between structural constraints and individual or group agency.

4.1. Theoretical Traditions and Scholarly Frameworks

The intellectual literature concerning analysis of capitalism: commodification, labor theory of value, and surplus value extraction features diverse theoretical arguments. Positivist and functionalist approaches analyze how social patterns contribute to systemic equilibrium, institutional continuity, and normative integration. In stark contrast, conflict, critical, and subaltern approaches demonstrate how institutional arrangements embody structural inequalities, class exploitation, caste hegemony, and patriarchal dominance.

Contemporary sociological theory moves beyond static structuralism by embracing dynamic models of practice, discourse, and performativity. Scholars utilize structuration theory, field-habitus models, and intersectional matrices to examine how individuals navigate institutional rules, mobilize cultural resources, and contest entrenched asymmetries in everyday life.

Theoretical Paradigm	Primary Analytical Focus	Epistemological Assumptions	Application to Analysis of Capitalism:
Structural Functionalism	Systemic equilibrium, institutional roles, social integration	Institutions exist to fulfill vital functional needs of the social organism	Examines the functional contributions of analysis of capitalism: commodification, labor theory of value, and surplus value extraction to social order.

Sociologists must examine the epistemological assumptions underlying quantitative indicators, survey enumeration, and qualitative ethnographic observations.

Furthermore, an intersectional analytical framework is indispensable. The intersecting vectors of caste identity, socioeconomic class, gender roles, regional location, and generational status must be simultaneously evaluated to comprehend the diverse lived realities of social actors in contemporary society.

5. Comprehensive Analysis of Theory of Alienation: Four Dimensions (From Product, Production Process, Species-Essence, and Fellow Workers)

The scholarly investigation of **Theory of Alienation: Four Dimensions (From Product, Production Process, Species-Essence, and Fellow Workers)** represents a core analytical domain within this course. In advanced sociological scholarship, this theme embodies foundational conceptual debates, institutional structures, and empirical challenges that shape contemporary social reality. Scholars have examined this topic from competing theoretical traditions, ranging from classical structural formulations to critical neo-Marxist, feminist, subaltern, and post-modern paradigms.

Analyzing theory of alienation: four dimensions (from product, production process, species-essence, and fellow workers) requires unbundling its complex internal components and historical trajectories. Sociologists demonstrate that institutional practices, social identities, and normative systems are never natural givens; they are socially produced, politically negotiated, and contested over time. The analyst must rigorously evaluate the reciprocal interactions between structural constraints and individual or group agency.

5.1. Theoretical Traditions and Scholarly Frameworks

The intellectual literature concerning theory of alienation: four dimensions (from product, production process, species-essence, and fellow workers) features diverse theoretical arguments. Positivist and functionalist approaches analyze how social patterns contribute to systemic equilibrium, institutional continuity, and normative integration. In stark contrast, conflict, critical, and subaltern approaches demonstrate how institutional arrangements embody structural inequalities, class exploitation, caste hegemony, and patriarchal dominance.

Contemporary sociological theory moves beyond static structuralism by embracing dynamic models of practice, discourse, and performativity. Scholars utilize structuration theory, field-habitus models, and intersectional matrices to examine how individuals navigate institutional rules, mobilize cultural resources, and contest entrenched asymmetries in everyday life.

5.3. Critical Methodological and Epistemological Issues

Investigating theory of alienation: four dimensions (from product, production process, species-essence, and fellow workers) requires methodological reflexivity. Sociologists must examine the epistemological assumptions underlying quantitative indicators, survey enumeration, and qualitative ethnographic observations.

Furthermore, an intersectional analytical framework is indispensable. The intersecting vectors of caste identity, socioeconomic class, gender roles, regional location, and generational status must be simultaneously evaluated to comprehend the diverse lived realities of social actors in contemporary society.

6. Comprehensive Analysis of Class Consciousness, False Consciousness, and Revolutionary Transformation (Class-in-itself to Class-for-itself)

The scholarly investigation of **Class Consciousness, False Consciousness, and Revolutionary Transformation (Class-in-itself to Class-for-itself)** represents a core analytical domain within this course. In advanced sociological scholarship, this theme embodies foundational conceptual debates, institutional structures, and empirical challenges that shape contemporary social reality. Scholars have examined this topic from competing theoretical traditions, ranging from classical structural formulations to critical neo-Marxist, feminist, subaltern, and post-modern paradigms.

Analyzing class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) requires unbundling its complex internal components and historical trajectories. Sociologists demonstrate that institutional practices, social identities, and normative systems are never natural givens; they are socially produced, politically negotiated, and contested over time. The analyst must rigorously evaluate the reciprocal interactions between structural constraints and individual or group agency.

6.1. Theoretical Traditions and Scholarly Frameworks

The intellectual literature concerning class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) features diverse theoretical arguments. Positivist and functionalist approaches analyze how social patterns contribute to systemic equilibrium, institutional continuity, and normative integration. In stark contrast, conflict, critical, and subaltern approaches demonstrate how institutional arrangements embody structural inequalities, class exploitation, caste hegemony, and patriarchal dominance.

Contemporary sociological theory moves beyond static structuralism by embracing dynamic models of practice, discourse, and performativity. Scholars utilize structuration theory, field-habitus models, and intersectional matrices to examine how individuals navigate institutional rules, mobilize cultural resources, and contest entrenched asymmetries in everyday life.

Theoretical Paradigm	Primary Analytical Focus	Epistemological Assumptions	Application to Class Consciousness, Fal
Structural Functionalism	Systemic equilibrium, institutional roles, social integration	Institutions exist to fulfill vital functional needs of the social organism	Examines the functional contributions of class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) to social order.
Conflict & Critical Perspective	Power monopolies, class hegemony, resource exploitation	Social patterns reflect material interests and dominance of ruling groups	Unmasks how class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) reproduces structural oppression and privilege.
Interpretative & Post-Modern	Discursive formations, symbolic meaning, performativity	Reality is socially constructed through language, symbols, and gaze	Analyzes how actors construct, negotiate, and perform class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself).
Subaltern & Post-Colonial	Subaltern standpoints, anti-caste critique, decolonization	Eurocentric models obscure subaltern lived realities and colonial violence	Reinterprets class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) from the perspectives of Dalits, Adivasis, and women.

6.2. Institutional Operations and Empirical Manifestations

In lived empirical reality, class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) functions across diverse institutional spheres—including family arrangements, state bureaucracies, corporate markets, community associations, and digital communication networks. These

institutional sites reveal how abstract cultural ideologies and macroeconomic imperatives are translated into concrete social expectations and differential access to resources.

Within the Indian socio-cultural matrix, traditional structures frequently articulate with modern bureaucratic, market, and technological forces. Rather than experiencing simple unilinear modernization, Indian society exhibits complex configurations where traditional caste hierarchies, kinship networks, and religious identities fuse with modern democratic politics, neoliberal capitalism, and consumer culture.

> **Sociological Insight: Empirical Dimensions in India & Keralam**
>
> Within the empirical setting of Keralam and greater India, **Class Consciousness, False Consciousness, and Revolutionary Transformation (Class-in-itself to Class-for-itself)** manifests unique dynamics. The state's celebrated history of subaltern social reform (Kerala Navodhanam), radical land reforms dismantling the feudal Janmi system, universal public education, expansive welfare safety nets, and heavy reliance on transnational migration and Gulf remittances provides a distinctive sociological laboratory for observing social change, institutional democratization, and second-generation development challenges.

6.3. Critical Methodological and Epistemological Issues

Investigating class consciousness, false consciousness, and revolutionary transformation (class-in-itself to class-for-itself) requires methodological reflexivity. Sociologists must examine the epistemological assumptions underlying quantitative indicators, survey enumeration, and qualitative ethnographic observations.

Furthermore, an intersectional analytical framework is indispensable. The intersecting vectors of caste identity, socioeconomic class, gender roles, regional location, and generational status must be simultaneously evaluated to comprehend the diverse lived realities of social actors in contemporary society.

7. Comparative Analytical Matrix & Applied Case Analysis

To achieve comprehensive academic synthesis of Module 3, the multidimensional elements of this subject matter are systematically contrasted across distinct socio-historical paradigms in the comparative matrix below:

Comparative Parameter	Traditional / Pre-Modern Context	Modern Industrial & Colonial Period	Contemporary Globalized & Digital Era
Organizing Principle	Ascriptive status, ritual hierarchy, localized agrarian subsistence	Rational-legal bureaucracy, capital accumulation, urbanization	Networked information flows, flexible labor, global consumerism
Power & Hegemony	Feudal landlords, religious orthodoxy, traditional monarchies	Colonial administrative apparatus, modern state institutions, industrial elites	Transnational corporations, technocratic governance, algorithmic platforms
Subjectivity & Agency	Collective corporate identity rooted in lineage, caste, or village	Civic citizen identity, trade union solidarity, anti-colonial nationalism	Individualized, fluid, and reflexive identities shaped by media and consumption
Modes of Resistance	Peasant revolts, religious millenarianism, everyday non-compliance	Socio-religious reform movements, organized labor strikes, electoral politics	Decentralized digital networks, identity-based movements, environmental activism

Applied Sociological Case Study: Socio-Historical Transformations in Keralam

Empirical Context: Kerala's historical trajectory offers a celebrated case study for examining institutional transformation. From a rigid 19th-century caste feudal structure characterized by severe untouchability and unapproachability, the region transformed into one of the most egalitarian and politically conscious states in South Asia.

Analytical Evaluation: Applying the concepts of Module 3, students analyze how the confluence of subaltern reform mobilizations (Sree Narayana Guru, Ayyankali), missionary and state education, radical political unionism, the 1969 Land Reforms Act, and mass migration to the Persian Gulf fundamentally restructured traditional social hierarchies. However, contemporary sociologists also examine emerging contradictions: persistent gender asymmetries in the formal workforce, high elderly dependency ratios, youth out-migration, and ecological vulnerabilities.

8. Applied Policy Dimensions & Social Interventions

Sociological analysis provides vital diagnostics for informing progressive social policy, grassroots development programs, and community welfare initiatives. The theoretical principles analyzed in this module yield actionable insights across multiple applied arenas:

- **Evidence-Based Social Policy:** Formulating governmental welfare interventions that address the structural root causes of poverty, marginalization, and educational disparity rather than treating superficial symptoms.
- **Community-Driven Development:** Implementing participatory rural appraisal (PRA), social mapping, and stakeholder consultation to ensure grassroots decentralization and authentic democratic empowerment (as exemplified by Kerala's People's Plan Campaign).
- **Human Rights & Social Justice Advocacy:** Utilizing empirical sociological data to expose systemic discrimination, gender-based violence, caste atrocities, and environmental injustice before judicial bodies, legislative committees, and international human rights forums.
- **Organizational Development & Conflict Resolution:** Enhancing diversity management, ethical communication, and collaborative team functioning in public institutions, non-profit organizations, and social enterprises.

9. Pedagogical Synthesis & Examination Preparation

In concluding Module 3 ("Karl Marx: Foundations of Revolutionary Materialism"), students should consolidate their command of the central theoretical paradigms, comparative taxonomies, and empirical debates examined. Mastering sociology requires developing the capacity to critically interrogate social structures, challenge commonsense assumptions, and evaluate institutional dynamics with analytical rigor.

Key Concept / Theorist	Foundational Sociological Definition	Analytical & Curricular Significance
Structural Inequality	Systematically unequal distribution of resources, power, and opportunities built into social institutions.	Demonstrates that disparities are structured outcomes of institutional arrangements rather than individual deficiencies.
Social Hegemony (Antonio Gramsci)	Dominance maintained through cultural leadership and moral	Explains how ruling groups win the spontaneous consent of subordinate classes

Key Concept / Theorist	Foundational Sociological Definition	Analytical & Curricular Significance
	consensus rather than physical force.	through ideological institutions.
Cultural Capital (Pierre Bourdieu)	Accumulated cultural knowledge, linguistic skills, credentials, and dispositions conferring social power.	Illuminates how educational institutions reproduce class hierarchies under the guise of meritocracy.
Epistemological Reflexivity	The systematic practice of scrutinizing the researcher's own positionality, assumptions, and power relations.	Guarantees methodological integrity and ethical rigor in qualitative and quantitative social research.

Self-Assessment & Critical Examination Questions

1. Critically evaluate the theoretical debates and foundational concepts articulated in karl marx: foundations of revolutionary materialism, contrasting functionalist and conflict approaches.
2. Examine how historical transformations, state interventions, and social movements in India and Keralam have reshaped institutional structures and power dynamics.
3. Discuss the methodological challenges and ethical responsibilities involved in empirical sociological inquiry into contemporary social problems.
4. Analyze the practical relevance of sociological insights in designing inclusive development policies and empowering marginalized communities.
