B.A. Sociology Honours | Semester 6 | SOC6CJ305

Environmental Sociology

Course Code: SOC6CJ305 • Module 4 Notes

Module 4: ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN

Course: SOC6CJ305 – Environmental Sociology • **University of Calicut (CUFYUGP 2024)**

1. Conceptual Scope, Epistemic Frameworks & Curricular Foundations

The academic investigation of **Environmental Sociology**, specifically regarding Module 4 (ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN), is anchored within the rigorous undergraduate curriculum of Calicut University under the CUFYUGP 2024 regulations. This module is structured around core thematic units designed to provide learners with both theoretical mastery and critical empirical awareness.

In contemporary sociological scholarship, society is understood not as a static aggregate of detached individuals, but as an emergent, dynamically organized matrix of structured relations, institutionalized practices, and cultural meanings. C. Wright Mills famously articulated that the primary purpose of the sociological imagination is to comprehend the intricate connections between individual biographies and macroscopic historical structures. Throughout this module, learners examine how institutional arrangements reproduce order, manage social contradictions, and condition individual agency.

2. Systematic Sociological Examination of Major Environmental movements in India

The scholarly examination of **Major Environmental movements in India** constitutes an indispensable analytical domain within *Environmental Sociology*. In sociological epistemology, social phenomena are neither arbitrary behavioral aggregates nor biologically predetermined necessities; rather, they represent emergent structural configurations shaped by historical trajectories, institutional mechanisms, power relations, and normative consensus.

When interrogating major environmental movements in india, sociologists examine the dynamic interplay between microscopic individual agency and macroscopic structural constraints. Every social institution or practice operates through established networks of socialization, sanctions, and structural incentives that reproduce stability while generating internal contradictions that drive progressive social transformation.

2.1. Theoretical Paradigms and Epistemological Frameworks

Contemporary sociological literature concerning major environmental movements in india is characterized by profound theoretical plurality. The structural-functionalist tradition—derived from Emile Durkheim, Talcott Parsons, and Robert K. Merton—interrogates this domain through functional prerequisites, institutional integration, and equilibrium maintenance, distinguishing between manifest objectives and latent structural consequences.

Conversely, critical conflict paradigms and Marxist traditions—elaborated by Karl Marx, Antonio Gramsci, and contemporary critical theorists—unmask how institutional arrangements surrounding major environmental movements in india reflect underlying relations of production, class exploitation, and ideological hegemony. Furthermore, feminist and subaltern perspectives illuminate how patriarchal structures, graded caste inequalities, and colonial legacies intersect to marginalise subordinate social groups within these institutional networks.

DegreeLive

2.2. Institutional Mechanics and Empirical Realities

From an empirical perspective, the operational mechanics of major environmental movements in india must be examined within concrete socio-historical contexts. In developing societies and particularly in the complex social matrix of contemporary India, modern statutory laws, market forces, and constitutional values coexist alongside enduring traditional hierarchies of caste, kinship endogamy, and community networks.

Empirical field studies emphasize that social transformation is neither linear nor uniform. While urbanization, digital technology, democratic decentralization, and state welfare policies create new avenues for upward social mobility and civic participation, traditional elites often adapt, maintaining institutional control through informal patronage networks and economic monopolies. Understanding major environmental movements in india therefore requires rigorous empirical methodologies that combine quantitative demographic surveys with in-depth qualitative field ethnography.

2.3. Contemporary Policy Debates and Regional Applications

Within the context of Keralam and the wider Indian subcontinent, the practical implications of major environmental movements in india are directly manifested in contemporary policy interventions and grassroots mobilizations. Historical social reforms—notably the Kerala Renaissance (*Navodhanam*) movements, tenancy land reforms, and the devolution of planning authority to Panchayati Raj institutions—demonstrate how organized collective action can dismantle entrenched institutional privileges.

However, modern society faces complex second-generation challenges, including demographic aging, youth employment precarity, environmental vulnerabilities, and the integration of diverse social communities. Addressing these challenges requires nuanced sociological literacy, evidence-based policy design, and an unwavering commitment to social justice, constitutional equity, and inclusive human development.

3. Systematic Sociological Examination of Environmental movements in Kerala

The scholarly examination of **Environmental movements in Kerala** constitutes an indispensable analytical domain within *Environmental Sociology*. In sociological epistemology, social phenomena are neither arbitrary behavioral aggregates nor biologically predetermined necessities; rather, they represent emergent structural configurations shaped by historical trajectories, institutional mechanisms, power relations, and normative consensus.

When interrogating environmental movements in kerala, sociologists examine the dynamic interplay between microscopic individual agency and macroscopic structural constraints. Every social institution or practice operates through established networks of socialization, sanctions, and structural incentives that reproduce stability while generating internal contradictions that drive progressive social transformation.

3.1. Theoretical Paradigms and Epistemological Frameworks

Contemporary sociological literature concerning environmental movements in kerala is characterized by profound theoretical plurality. The structural-functionalist tradition—derived from Emile Durkheim, Talcott Parsons, and Robert K. Merton—interrogates this domain through functional prerequisites, institutional integration, and equilibrium maintenance, distinguishing between manifest objectives and latent structural consequences.

Conversely, critical conflict paradigms and Marxist traditions—elaborated by Karl Marx, Antonio Gramsci, and contemporary critical theorists—unmask how institutional arrangements surrounding environmental movements in kerala reflect underlying relations of production, class exploitation, and ideological hegemony.

Furthermore, feminist and subaltern perspectives illuminate how patriarchal structures, graded caste inequalities, and colonial legacies intersect to marginalise subordinate social groups within these institutional networks.

3.2. Institutional Mechanics and Empirical Realities

From an empirical perspective, the operational mechanics of environmental movements in kerala must be examined within concrete socio-historical contexts. In developing societies and particularly in the complex social matrix of contemporary India, modern statutory laws, market forces, and constitutional values coexist alongside enduring traditional hierarchies of caste, kinship endogamy, and community networks.

Empirical field studies emphasize that social transformation is neither linear nor uniform. While urbanization, digital technology, democratic decentralization, and state welfare policies create new avenues for upward social mobility and civic participation, traditional elites often adapt, maintaining institutional control through informal patronage networks and economic monopolies. Understanding environmental movements in kerala therefore requires rigorous empirical methodologies that combine quantitative demographic surveys with in-depth qualitative field ethnography.

3.3. Contemporary Policy Debates and Regional Applications

Within the context of Keralam and the wider Indian subcontinent, the practical implications of environmental movements in kerala are directly manifested in contemporary policy interventions and grassroots mobilizations. Historical social reforms—notably the Kerala Renaissance (*Navodhanam*) movements, tenancy land reforms, and the devolution of planning authority to Panchayati Raj institutions—demonstrate how organized collective action can dismantle entrenched institutional privileges.

However, modern society faces complex second-generation challenges, including demographic aging, youth employment precarity, environmental vulnerabilities, and the integration of diverse social communities. Addressing these challenges requires nuanced sociological literacy, evidence-based policy design, and an unwavering commitment to social justice, constitutional equity, and inclusive human development.

4. Systematic Sociological Examination of Views of Ramachandra Guha, Vandana Shiva and Sunita Naraien

The scholarly examination of **Views of Ramachandra Guha, Vandana Shiva and Sunita Naraien** constitutes an indispensable analytical domain within *Environmental Sociology*. In sociological epistemology, social phenomena are neither arbitrary behavioral aggregates nor biologically predetermined necessities; rather, they represent emergent structural configurations shaped by historical trajectories, institutional mechanisms, power relations, and normative consensus.

When interrogating views of ramachandra guha, vandana shiva and sunita naraien, sociologists examine the dynamic interplay between microscopic individual agency and macroscopic structural constraints. Every social institution or practice operates through established networks of socialization, sanctions, and structural incentives that reproduce stability while generating internal contradictions that drive progressive social transformation.

4.1. Theoretical Paradigms and Epistemological Frameworks

Contemporary sociological literature concerning views of ramachandra guha, vandana shiva and sunita naraien is characterized by profound theoretical plurality. The structural-functionalist tradition—derived from Emile Durkheim, Talcott Parsons, and Robert K. Merton—interrogates this domain through functional

prerequisites, institutional integration, and equilibrium maintenance, distinguishing between manifest objectives and latent structural consequences.

Conversely, critical conflict paradigms and Marxist traditions—elaborated by Karl Marx, Antonio Gramsci, and contemporary critical theorists—unmask how institutional arrangements surrounding views of ramachandra guha, vandana shiva and sunita naraien reflect underlying relations of production, class exploitation, and ideological hegemony. Furthermore, feminist and subaltern perspectives illuminate how patriarchal structures, graded caste inequalities, and colonial legacies intersect to marginalise subordinate social groups within these institutional networks.

4.2. Institutional Mechanics and Empirical Realities

From an empirical perspective, the operational mechanics of views of ramachandra guha, vandana shiva and sunita naraien must be examined within concrete socio-historical contexts. In developing societies and particularly in the complex social matrix of contemporary India, modern statutory laws, market forces, and constitutional values coexist alongside enduring traditional hierarchies of caste, kinship endogamy, and community networks.

Empirical field studies emphasize that social transformation is neither linear nor uniform. While urbanization, digital technology, democratic decentralization, and state welfare policies create new avenues for upward social mobility and civic participation, traditional elites often adapt, maintaining institutional control through informal patronage networks and economic monopolies. Understanding views of ramachandra guha, vandana shiva and sunita naraien therefore requires rigorous empirical methodologies that combine quantitative demographic surveys with in-depth qualitative field ethnography.

4.3. Contemporary Policy Debates and Regional Applications

Within the context of Keralam and the wider Indian subcontinent, the practical implications of views of ramachandra guha, vandana shiva and sunita naraien are directly manifested in contemporary policy interventions and grassroots mobilizations. Historical social reforms—notably the Kerala Renaissance (*Navodhanam*) movements, tenancy land reforms, and the devolution of planning authority to Panchayati Raj institutions—demonstrate how organized collective action can dismantle entrenched institutional privileges.

However, modern society faces complex second-generation challenges, including demographic aging, youth employment precarity, environmental vulnerabilities, and the integration of diverse social communities. Addressing these challenges requires nuanced sociological literacy, evidence-based policy design, and an unwavering commitment to social justice, constitutional equity, and inclusive human development.

5. Systematic Sociological Examination of Reports of the Gadgil committee and Kasturirangan committee on the Western Ghats

The scholarly examination of **Reports of the Gadgil committee and Kasturirangan committee on the Western Ghats** constitutes an indispensable analytical domain within *Environmental Sociology*. In sociological epistemology, social phenomena are neither arbitrary behavioral aggregates nor biologically predetermined necessities; rather, they represent emergent structural configurations shaped by historical trajectories, institutional mechanisms, power relations, and normative consensus.

When interrogating reports of the gadgil committee and kasturirangan committee on the western ghats, sociologists examine the dynamic interplay between microscopic individual agency and macroscopic structural constraints. Every social institution or practice operates through established networks of

socialization, sanctions, and structural incentives that reproduce stability while generating internal contradictions that drive progressive social transformation.

5.1. Theoretical Paradigms and Epistemological Frameworks

Contemporary sociological literature concerning reports of the gadgil committee and kasturirangan committee on the western ghats is characterized by profound theoretical plurality. The structural-functionalist tradition—derived from Emile Durkheim, Talcott Parsons, and Robert K. Merton—interrogates this domain through functional prerequisites, institutional integration, and equilibrium maintenance, distinguishing between manifest objectives and latent structural consequences.

Conversely, critical conflict paradigms and Marxist traditions—elaborated by Karl Marx, Antonio Gramsci, and contemporary critical theorists—unmask how institutional arrangements surrounding reports of the gadgil committee and kasturirangan committee on the western ghats reflect underlying relations of production, class exploitation, and ideological hegemony. Furthermore, feminist and subaltern perspectives illuminate how patriarchal structures, graded caste inequalities, and colonial legacies intersect to marginalise subordinate social groups within these institutional networks.

5.2. Institutional Mechanics and Empirical Realities

From an empirical perspective, the operational mechanics of reports of the gadgil committee and kasturirangan committee on the western ghats must be examined within concrete socio-historical contexts. In developing societies and particularly in the complex social matrix of contemporary India, modern statutory laws, market forces, and constitutional values coexist alongside enduring traditional hierarchies of caste, kinship endogamy, and community networks.

Empirical field studies emphasize that social transformation is neither linear nor uniform. While urbanization, digital technology, democratic decentralization, and state welfare policies create new avenues for upward social mobility and civic participation, traditional elites often adapt, maintaining institutional control through informal patronage networks and economic monopolies. Understanding reports of the gadgil committee and kasturirangan committee on the western ghats therefore requires rigorous empirical methodologies that combine quantitative demographic surveys with in-depth qualitative field ethnography.

5.3. Contemporary Policy Debates and Regional Applications

Within the context of Keralam and the wider Indian subcontinent, the practical implications of reports of the gadgil committee and kasturirangan committee on the western ghats are directly manifested in contemporary policy interventions and grassroots mobilizations. Historical social reforms—notably the Kerala Renaissance (*Navodhanam*) movements, tenancy land reforms, and the devolution of planning authority to Panchayati Raj institutions—demonstrate how organized collective action can dismantle entrenched institutional privileges.

However, modern society faces complex second-generation challenges, including demographic aging, youth employment precarity, environmental vulnerabilities, and the integration of diverse social communities. Addressing these challenges requires nuanced sociological literacy, evidence-based policy design, and an unwavering commitment to social justice, constitutional equity, and inclusive human development.

6. Systematic Sociological Examination of Environmental Policies and Laws in India Guha, R. (2000). Environmentalism: A Global History. Longman Raghunandan, D., & Menon, M. (Eds.). (1985). The Silent Valley Hydroelectric Project. Centre for Science and Environment. Gadgil, M., & Kasturirangan, K.

(Reports). Overview and key recommendations. Leelakrishnan, P. (1999). The Environmental Law in India. Butterworth-Heinemann. Historical social reforms—notably the Kerala Renaissance (*Navodhanam*) movements, tenancy land reforms, and the devolution of planning authority to Panchayati Raj institutions—demonstrate how organized collective action can dismantle entrenched institutional privileges.

However, modern society faces complex second-generation challenges, including demographic aging, youth employment precarity, environmental vulnerabilities, and the integration of diverse social communities. Addressing these challenges requires nuanced sociological literacy, evidence-based policy design, and an unwavering commitment to social justice, constitutional equity, and inclusive human development.

3. Classical & Modern Sociological Epistemologies: Structural Dynamics of ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN

The systematic academic investigation of **ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN** within the discipline of sociology requires an interrogation of foundational theoretical paradigms. Classical sociological thought—anchored in the foundational works of Auguste Comte, Karl Marx, Emile Durkheim, and Max Weber—established divergent epistemological trajectories for examining social reality.

In analyzing major environmental movements in india, structural-functionalist approaches emphasize the systemic equilibrium, functional prerequisites, and integration mechanisms that preserve social continuity across generations.

Conversely, critical and dialectical traditions analyze how major environmental movements in india serves as an arena of structural contestation, ideological reproduction, and differential access to material resources. Under historical materialism, institutional configurations cannot be analyzed in isolation from the prevailing relations of production and class antagonisms. Applying this critical perspective illuminates how historical transformations reshape normative expectations, occupational hierarchies, and the distribution of social status.

Sociological Paradigm	Core Analytical Lens	Primary Theoretical Focus	Application to ENVIRONMENTAL MOVEMENTS
Structural Functionalism	Equilibrium & Functional Adaptation	Normative consensus, role differentiation, integration	Interprets systemic continuity and institutional stability.
Conflict & Critical Theory	Structural Inequality & Hegemony	Power asymmetries, resource monopolies, ideological dominance	Unmasks exploitation, marginalisation, and institutional control.
Symbolic Interactionism	Intersubjective Meaning & Agency	Micro-level interactions, definition of the situation, symbols	Examines how actors negotiate roles and construct identity.
Post-Structural / Subaltern	Discourse, Power & Marginality	Deconstruction of hegemony, localized resistances, standpoint	Highlights silenced narratives and localized social movements.

Furthermore, interpretative sociology, pioneered by Max Weber's concept of *Verstehen* (empathic understanding) and later elaborated by symbolic interactionists like George Herbert Mead and Erving Goffman, highlights the centrality of subjective meaning in social action. Applying this interpretive framework to environmental movements in kerala demonstrates that social actors are neither passive cultural automatons nor wholly detached rational decision-makers; rather, they continually negotiate, construct, and modify institutional realities through everyday social interactions and communicative rituals.

4. Institutional Mechanics, Empirical Fieldwork & Indian Sociological Realities

Within the context of contemporary Indian society, the analysis of **ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN** takes on profound empirical complexity. Indian sociological scholarship—pioneered by thinkers such as G.S. Ghurye, M.N. Srinivas, Irawati Karve, A.R. Desai, and B.R. Ambedkar—demonstrates that Western theoretical models must be critically re-examined when confronted with the unique intersection of caste, class, gender, community, and region in South Asia.

When interrogating **Environmental movements in Kerala**, researchers encounter the dual realities of continuity and change. While constitutional democracy, urbanization, industrial development, and legal reforms have modernized public institutions, primordial structures like caste hierarchies, endogamous marriage practices, and patriarchal kinship networks persist in redefined forms. M.N. Srinivas's seminal

concepts of *Sanskritization* and the *Dominant Caste*, alongside A.R. Desai's political-economic critiques of agrarian capitalism, provide indispensable frameworks for understanding these contemporary contradictions.

In empirical sociological research, methodological rigor demands a careful synthesis of quantitative surveys and qualitative ethnography. Whether assessing social stratification, educational attainment, occupational mobility, or community welfare interventions, scholars must account for structural exclusions. As Dr. B.R. Ambedkar emphatically demonstrated, the caste system is not merely a division of labour, but a hierarchical division of labourers based on graded inequality. In the context of views of ramachandra guha, vandana shiva and sunita naraien, understanding these deep-seated structural barriers is essential for designing effective social welfare policies and affirmative action programs.

5. Kerala Experience: Public Action, Social Transformation & Democratic Decentralisation

A foundational requirement of the Calicut University CUFYUGP 2024 curriculum is the contextualisation of sociological principles within the historical and contemporary realities of Keralam. The "Kerala Model of Development"—characterized by high human development indicators (exceptional literacy rates, high life expectancy, and low infant mortality rates) despite moderate per capita economic growth—serves as a world-renowned case study in sociology.

The social genesis of contemporary Kerala is directly rooted in the *Navodhanam* (Renaissance) movements of the late nineteenth and early twentieth centuries. Visionary social reformers—including Sree Narayana Guru, Ayyankali, Chattampi Swamikal, Poykayil Yohannan (Kumara Gurudevan), and V.T. Bhattathiripad—mobilized subaltern communities to challenge untouchability, temple entry restrictions, dress codes, and educational exclusions. Their historic struggles transformed caste-based feudal servitude into a vibrant culture of public action, civic participation, and democratic consciousness.

Historical / Institutional Catalyst	Primary Sociological Dimension	Key Historical Milestones	Structural Impact on Kerala Society
Socio-Religious Reform (Navodhanam)	Subaltern Mobilization & Caste Reform	Aruvippuram Consecration (1888), Villuvandi Samaram (1893)	Dismantled ritual pollution and opened public schools to Dalits.
Agrarian Land Reforms	Tenancy Abolition & Land Redistribution	Kerala Land Reforms (Amendment) Act 1969	Abolished feudal landlordism (Janmi system) and conferred hutment rights.
Democratic Decentralisation	Grassroots Governance & Planning	People's Plan Campaign (1996), Panchayati Raj	Devolved 35–40% of state developmental funds to local self-governments.
Kudumbashree Mission	Women's Empowerment & Social Capital	State Poverty Eradication Mission (1998)	Mobilized millions of women into neighborhood self-help networks.

In contemporary sociological discourse, the Kerala experience also presents emerging second-generation challenges directly relevant to ENVIRONMENTAL MOVEMENTS AND PERSPECTIVES IN. These include an accelerating demographic transition characterized by population aging, escalating healthcare and geriatric care demands, persistent educated unemployment, youth out-migration, ecological fragility, and the complex integration of interstate migrant workers within the domestic informal economy.
